

Bismillahir Rahmanir Rahim

Dhaka International University, Bangladesh

Department of CSE

Assignment No: 01 & 02

7nd Semester E83 Batch

Course Code: CSE-301

Course Title: Algorithm Design and Analysis

Submitted To:

Md. Zahidul Islam

Assistant Professor

Department of CSE, DIU

Submitted By:

Md. Sharif Uddin

CSE EVE-83 Batch

Roll No: 18

REG Id: CS-E-83-20-113117

Submission Date: May 27, 2022

Assignment No: 01

Assignment Name: Write an algorithm and program to find the maximum and minimum number from an array list by using any language.

Aim: I will do this to find the maximum and minimum number from an array list.

Algorithm: Algorithm to find the maximum and minimum number from an array list.

```
Algorithm MaxAndMin(A,n)
// A is an Array of size n.
{
    MaxResult := MinResult := A[1];
    for i := 1 to n do
        if A[i] > MaxResult then MaxResult := A[i];
            return MaxResult;
        else if A[i] < MinResult then MinResult := A[i];
            return MinResult;
}
```

Program/Code: Programming code to find the maximum and minimum number from an array list by using C plus plus language.

```
#include <iostream>
using namespace std;
int main(){
    int i, maxResult, minResult, n = 5, a[] = {5, 7, 1, 9, 3};
    maxResult = minResult = a[0];
    for(i = 1 ; i < n ; i++){
        if(a[i] > maxResult){
```

```

    maxResult = a[i];
}
if(a[i] < minResult){
    minResult = a[i];
}
}

cout << "The Maximum value is " << maxResult << endl;
cout << "The Minimum value is " << minResult << endl;

return 0;
}

```

Output: Here array was a[] = {5, 7, 1, 9, 3}, After executing the program we get the output.

```

C:\Users\shari\Downloads\Tic-Tac-Toe-master\Tic-Tac-Toe-master\minMaxFromArray.exe
The Maximum value is 9
The Minimum value is 1

Process returned 0 (0x0)   execution time : 4.591 s
Press any key to continue.

```

End the assignment 01

Assignment No: 02

Assignment Name: Write an algorithm and program to sort as ascending and descending from an un-order array list by using any language.

Aim: I will do this to sort as ascending and descending from an un-order array list/

Algorithm: Algorithm to sort as ascending and descending from an un-order array list.

```

Algorithm SortAsAseAndDesFUArrayList(a, n)
// Sort the array a[1 : n] into an ascending and descending order.
{
    for i:= 1 to n do
    {
        j := i;
        {
            for k to n do
            if a[k] < a[j] then set a[j] := a[k], a[k] := a[j].
                return AssendingArrayList;
            else if a[k] > a[j] then set a[j] := a[k], a[k] := a[j].
                return DesendingArrayList;
        }
    }
}

```

Program/Code: Programming code to sort as ascending and descending from an un-order array list by using C plus plus language.

```

#include <iostream>
using namespace std;
int main() {
    int i, j, k, a[5]={4,5,1,10,7}, n=5, temp;
    for(i = 0; i < n; i++){
        j = i;
        for(k = i+1; k < n; k++){
            if(a[k] < a[j]){
                temp = a[j];

```

```

        a[j] = a[k];
        a[k] = temp;
    }
}

cout << "After asending sorting is: ";
for(i = 0; i < n; i++){
    cout << a[i] << " ";
}

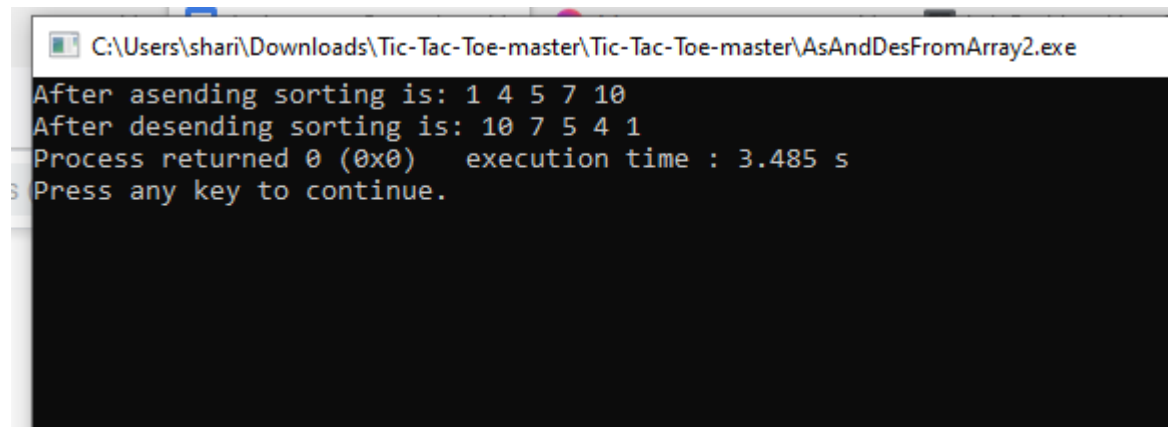

for(i = 0; i < n; i++){
    j = i;
    for(k = i+1; k < n; k++){
        if(a[k] > a[j]){
            temp = a[j];
            a[j] = a[k];
            a[k] = temp;
        }
    }
}

cout << "\nAfter desending sorting is: ";
for(i = 0; i < n; i++){
    cout << a[i] << " ";
}

return 0;
}

```

Output: Here array was a[5]={4,5,1,10,7}, After executing the program we get the output.

```
C:\Users\shari\Downloads\Tic-Tac-Toe-master\Tic-Tac-Toe-master\AsAndDesFromArray2.exe
After asending sorting is: 1 4 5 7 10
After desending sorting is: 10 7 5 4 1
Process returned 0 (0x0) execution time : 3.485 s
Press any key to continue.
```

End the assignment 02
